

CoreMatrix Materials

PMI Foam Core RFQ Project Brief

Use this brief to organize the information needed for a PMI foam core, CNC-machined core, or composite-core enquiry.

Project input	Information to provide
Company and contact	Name, company, country, work email, phone.
Component	Application, part description, and available CAD or drawing.
Material direction	PMI foam form, density target, thickness, or sheet-size requirement if known.
Processing	CNC machining, thermoforming, bonding, prepreg, autoclave, RTM, vacuum, or another project process.
Geometry	Flat, curved, double-curved, complex 3D, features, grooves, holes, or interfaces.
Quality	Drawing revision, required tolerance if defined, inspection and packing expectations.
Commercial context	Quantity, target delivery, and additional requirements.

Technical data integrity

Please request the applicable technical datasheet for the selected material system. Properties, temperature context, tolerances, availability, and other technical values must be confirmed for the specific grade and project.
